Malarial survey of the Wola Chari town

From

The Sanitary Commr in Rangoon

No. GS 264 Dated 15.1.20 Received 17.1.20

Diary No. 5177	Enclos 1	Spare Copies.	Serial No. 1

Brief Abstract of Letter.

Forwards herewith, with reference to G.O. No 730-2 dated 24.7.19, the report of the malarial survey of the town of Wola Chari and has found that the malarious character of the town is due to the presence of the town moats as it is removal for a healthier site and that mosquitoes in the town together with the Commr thereof

NOTES AND ORDERS.

1) Both the Municipal Council & the Deputy C do not seem to favour the entire abandonment of the town Moat only urge for its improvement & relieving its congestion by forming a new Embankment Moat.

Notes—First Sheet.

Offg Sanitary Commissioner with the Government of
H H the Maharaja of Mysore, BANGALORE

To

C. S. Balasundaram Iyer Esq., B. A.,
Chief Secretary to the Government of Mysore,
B a n g a l o r e.

Sir,

With reference to Government order No. R. 750-2h Mi. 168-18-4 dated the 14th July 1919, I have the honor to state that I inspected the Holalkere town and found that it is surrounded on all sides by swamps, tanks and ditches - conditions which do not admit of much improvement unless enormous sums of money are spent I accordingly advised the shifting of the town to the proximity of the railway station, where very good sites are available. I submit copies of correspondence on the subject and request instructions as to whether the proposed malarial survey of the old town has to be carried out. The clearing of drains, the removal of manure heaps and the laying out of a park can have but little effect in the improvement of Public Health in a town so badly situated as Holalkere. Nor can a malarial survey be expected to disclose much beyond the fact that the town needs to be removed from its present unhealthy situation I solicit orders in the matter.

Letter No C 110-4 dated the 6th September 1919 from the Sanitary Commissioner in Mysore to the Deputy Commissioner, Chitalsrug district

---

With reference to the correspondence ending with your letter D Dis 124 L F dated the 14th Ultimo, I have the honor to state that I inspected the Holalkere town recently and find that it is surrounded on all sides with swamps, tanks and ditches It appears to me that if the proposed malarial survey is carried out with a view to effect improvements, the cost of such improvements is likely to prove prohibitive Instead, the town may be shifted altogether to near the railway station, where very good sites are available Extensions may be laid out in this locality and the taluk and other offices shifted to them The people would then readily move out from the old town If this suggestion commends itself to you and to the Municipal Council, necessary action may be taken accordingly and the proposed malarial survey of the old town abandoned with the approval of Government

---

Letter No D Dis 53 Ml of 19-20 dated the 2nd January 1920 from the Deputy Commissioner, Chitaldrug district, to the Offg Sanitary Commissioner in Mysore

---

Adverting to your letter No C 110-4 dated the 6th September 1919 regarding the improvements to be effected to the town of Holalkere, I have the honor to forward herewith in original report No 78 dated the 5th December 1919 received from the President of the Municipal Council together with an extract from the resolution of the Municipal council dated the 21st November 1919 The municipal council are of opinion that an extension may be gradually laid out on a convenient site between the town and the railway station where the construction of houses should be encouraged as circumstances permit

As

As the entire shifting of the town at one and the same time is deemed impracticable, certain local improvements were suggested by me when I inspected the town in November last, a copy of which is herein enclosed for your information.

(E N C L O S U R E)

Inspection Notes.

Holalkere town is divided into pete and fort. The former is on a high level and is considered healthy. The latter is surrounded by a dilapidated fort wall and moats which are deep in some places and shallow in the greater portion. Houses have been built in hollow places adjoining the moat and this locality has become very unhealthy being water-logged.

To improve the sanitation of the locality the following improvements are suggested -

1 . To open a conservancy lane along the inner moat and gradually fill up the ditches

2. To dismantle houses situated in the hollow

3. To convert the temporary sites now used as kana, in front of the traveller's bungalow into house sites and dispose them off to the displaced population. A decent extension can be formed here.

Action to be taken on the following lines -

(a) Prepare block maps of the three localities in the fort proposed to be improved, showing the conservancy lane to be opened, houses and backyards to be acquired and demolished and other improvements to be effected

(b) Similarly prepare a plan of the proposed extension

(c) Prepare estimates for a box drain in the new Conservancy lane

(d) Preliminaries to be discussed in the Municipal council

MISCELLANEOUS

1. The drains are all choked up with accumulated filth and vegetation which should be cleared

2. Hundreds of manure heaps are stored recklessly in hollows in the town and near the taluk office. The insanitary condition of the town appears to be mainly due to this

3. A park or parks may be laid out in the reclaimed portion

portions of the moat by planting eucalyptus and other plants

of the town

Inspection Notes

Malalkere town is divided into petta and fort. The former is on a high level and is considered healthy. The latter is surrounded by dilapidated fortwall and moats which are deep in some places and shallow in the greater portion. Houses have been built in hollow places adjoining the moats and this locality has become very unhealthy being water logged.

To improve the sanitation of the locality the following improvements are suggested -

1. To open a conservancy lane along the inner moat and gradually fill up the ditches
2. To dismantle houses situated in the hollow
3. To convert the temporary sites now used as kana in front of the Travellers' Bungalow into house sites and dispose them of to the displaced population. A decent extension can be formed here.

Action to be taken on the following lines -

(a) Prepare block maps of the 3 localities in the fort proposed to be improved, showing the conservancy lane to be opened, houses and back yards to be acquired and demolished and other improvements to be effected.

(b) Similarly prepare a plan of the proposed extension.

(c) Prepare estimates for a box drain in the new conservancy lane.

(d) Preliminaries to be discussed in the municipal council.

Miscellaneous - 1. The drains are all choked up with accumulated filth and vegetation which should be cleared.

2. Hundreds of manure heaps are stored recklessly in hollows in the town and near the Taluk office. The insanitary condition of the town appears to be mainly due to this.

3. A park or parks may be laid out in the reclaimed portions of the moat by planting eucalyptus and other plants.
